Deputy Director
Intelligence Community Staff
Community Headquarters Building
Washington, D.C. 20505

SG1I

Dear [Redacted]

As a followup to our discussion last Thursday, I just want to close a few administrative loops with you. Subsequent to our discussion and your phone call to General Soyster, I met with Mr. D'Amato. From my perspective, we cleared up the immediate issues, and Dick has a current understanding of where we are in meeting our FY91 Congressional mandates. I pointed out to Dick that our comprehensive research plan will, indeed, include a balance between research and operational investigations. Furthermore, I have tasked our unit to develop a plan for the remainder of FY91 to focus on operational subjects, proficiency training, and calibration investigations. This will be done the week of 24 June.

Consequently, we have no immediate actions with Dick. We are continuing our full-court press to produce this month the deliverables on foreign activities and our comprehensive plan. Our contract is scheduled to be signed 21 June, and our staff has taken extraordinary measures over the recent months to expedite this action while still fulfilling all legal, regulatory, and procedural requirements.

As a final note, I would like to offer General Wood, you, and other ICS members that you deem appropriate a briefing on our current program activities, which would underscore the fact that we are in full compliance with the FY91

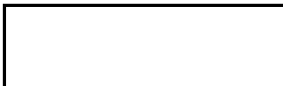

Congressional guidance. I believe the briefing/discussion would also clearly demonstrate that our staff has been very proactive and imaginative in fulfilling our requirements. If you believe this would be useful, we will be glad to work with your staff personnel to arrange a date and time convenient for all.

Respectfully,

Assistant Deputy Director
for Scientific and
Technical Intelligence
